EXTINCT FAMILIES.-Mr. Robert Stephenson leaves no family behind him .-His wife died many years ago, and he remained a widower, so that the direct line from George Stephenson, the emineut English engineer, has died out. James Watt, the famous British inventor, left no descendants. It appears that the men noted for mechanical genius, like many of those fan,ous in literature, science An endless variety. and government in Great Britain leave no children to perpetuate their names.— Shakespeare, Milton, Bacon, Newton, Harvey, Pope, Mansfield, Pitt, Fox, Gray, Cowper, Collins, Thompson, Goldsmith, Gay, Congreve, Hume, Bishop Butler, Locke, Hobbs, Adam Smith, Bentham, Davy, Sir Joshua Reynolds, Flaxman, Sir Thomas Lawrence, and others well known to fame in British annals, have no lineal representatives now living,

LARGE SHIP OF BYGONE DAYS .- Ptolemy Philopater, who lived some two hundred years before Christ, had a ship with 40 banks of rowers, being 560 English feet in length-190 feet longer than the the other; in height to gunwales, it was 90 feet, and from the highest part of the stern to the water line it was 100 feet. Stern to the water line it was 100 feet; it this city. had four rudders, each 60 feet long .-When it put to sea, it held more than 4'-000 rowers and 4,000 supernumeraries, and on the deck were 3,000 mariners. And, besides all these, there was a large body of men under the decks and a vast quantity of provisions and supplies.

A Nonle Little Girl.-The Warrentown Flag contains an account of the death, on last Thursday week, of a little girl of eight or nine years, daughter of Mr. Traverse Gough, living a few miles from Haymarket. In the absence of all older than herself, her clothing took fire. She first tried to suppress the flane's hersolf; then she asked her little sister of four years to throw water on her, but the little one ran, instead to call the neighbors. When they came, they found her out in the yard, and in reply to the question, "What was she doing there?" she said she thought if she staid in the house that the AN ENTIRE NEW STOCK ouse would eatch fire, and then burn the baby up too. What a noble, sensible, remark for one so young! She retained all her faculties to the last, conversed freely and bore her sufferings with a degree of fortitude truly remarkable for one of her age. The interesting little creature deserved a better fate.

RECENT arrivals from South America bring intelligence of a terrible earthquake at Copiapo, in Chili, by which more than H O S I E R Y, one-half of the town was destroyed, and causing a great loss of life. The shock was sensibly felt at Caldera, about 25 miles distant. It is reported that the water in the harbor receded some twenty three, feet and vessels at anchor swayed to and fro as if in a heavy sea,

New York reporters on the occasion of the Oviedo-Bertlett nuptials, they missed one item, the fee paid Archhishop Hughes for his invaluable services on the occasion. He is said to have received the snug little all kinds of sum of five thousand dollars.

POPULAR INTELLIGENCE .- Michigan in comparison to her sister States, stands distention. fourth on the list as having the greatest proportion of adults in her population who are able to read and write.

It is authoritively stated that the amount of money remitted home by Irishmen residents in America, the last year, for the purpose of assisting their friends to emigrate, was \$2,860,000. The ten preceeding years the amount remitted was \$49,680,000.
